

Eddie Martin

We have been raising St. Croix sheep since 2006. All of our flock are registered St. Croix sheep in SCHSB. We currently have approximately 65 females and 20 selected breeder rams in a rebuilding program after the 2019 drought. We have 6 breeding lines of St. Croixs in the flock to increase the speed of flock improvements and to protect the breed's gene pool.

I have served in both the former association and in SCHSB as an officer and director. Many of my thoughts, philosophy and passion for the St. Croix sheep breed can be seen in many articles in past issues of the News and Views and Facebook posts. I am grateful to serve in the association and to be able to help both new and experienced breeders.
